EDUCATION

The LNM Institute of Information Technology (LNMIIT) / Jaipur, India

Expected Graduation

Bachelor of Technology in Computer Science and Engineering

EXPERIENCE & MOBILE APP DELIVERY

Software Developer Intern (Mobile & Systems) / BuildBazaarX [[Consumer App Codebase](#) · [Supplier App Codebase](#)]

June 2026 – Present

- **Rapid Mobile App Delivery:** Engineered and shipped production-ready Android & iOS cross-platform applications using **Flutter & Dart** for a DPIIT-recognized marketplace under strict sprint deadlines.
- **Consumer App (Challenge & Solution):** Heavy image assets and complex product catalogs caused UI thread jank and checkout friction. *Solved by* engineering asynchronous image caching & infinite-scroll pagination for buttery-smooth 60fps performance, managing reactive cart/wishlist state with **Riverpod**, and integrating **Razorpay**.
- **Supplier App (Challenge & Solution):** Multi-step B2B inventory onboarding and price-variant rules caused data entry errors and desynced analytics. *Solved by* building multi-step form workflows with rigorous client-side validation and real-time interactive KPI dashboards synced securely via **Supabase**.

PROJECTS & PUBLISHED CODEBASES

Sortd — Cross-Platform Mobile Utility App / Flutter, Dart, Supabase, Provider [[Mobile App Repository](#)]

Personal Mobile Production App

- **End-to-End App Engineering:** Engineered a full-featured campus mobile ecosystem combining class schedule tracking, assignment deadlines, and peer-to-peer expense splitting (Udhaari).
- **Challenge & Solution:** Delivered a reliable local-first mobile architecture with battery-efficient, timezone-aware background push notifications and two-way real-time data sync via **Supabase**.
- Integrated **fl_chart** to parse complex expense data and render interactive financial analytics instantly on mobile screens.

Veritas — Full-Stack Decentralized Application / Next.js, Web3, Monad, Solidity [[GitHub Repo](#) · [Live Web Demo](#)]

Nexora'26 Top
Leaderboard

- Executed an intense 9+ hour hackathon sprint under tight delivery constraints, building an immutable AI perceptual forensics registry and topping the public Round 1 leaderboard at Nexora'26.

TECHNICAL SKILLS

Mobile & App Dev: Flutter, Dart, Cross-Platform Android & iOS Architecture, Riverpod, Provider, UI/UX 60fps Optimization.

Backend & Systems: Supabase (PostgreSQL, Auth, Realtime, RLS), Next.js, Firebase, Razorpay Integration, Git, GitHub.

Core Languages: Dart, C/C++, JavaScript, TypeScript, Solidity, HTML/CSS.

ACHIEVEMENTS & PROBLEM SOLVING

- **Algorithmic Problem Solving:** Solved **196+ problems** on Codeforces (35-day streak), demonstrating strong DSA foundations for writing optimized, bug-free application logic.
- **Rapid Delivery Record:** Proven track record of shipping end-to-end applications within compressed timelines (production intern releases & top hackathon leaderboards).
